About Us

Progrex PMC is Class Leading Project Management consultancy firm which provides specialist CPM scheduling, Cost Management, Delay analysis, BIM Modeling, Risk Management and Scheduling Training.

Vision

To become one of the leading Project Management Consultants in North America by 2020

Mission

We strive to provide the highest standards of quality for our clients to ensure all projects meet their objectives

Goal

Our aim is to make a difference in all our projects and empower our clients to complete successful and profitable projects

Our Services

Our services are tailored in a project-specific manner. We rigorously maintain our standards in supporting Construction projects from pre-contract and initiation to execution and closing phases. Our Schedulers and Cost professionals provide support to your Construction Project at any Stage.

Whether you are a General Contractor, Owner or Sub-Contractor, PROGEX has a solution that is tailored to your needs at any stage or your project life cycle. From CPM Scheduling, BIM Modeling, to Cost Management our services will guide you to win and execute your project profitably

Progrex PMC Construction Schedulers are Certified Cost Professionals from AACE

Our Team

Our experienced and highly committed construction schedulers and planning engineers are dedicated to rendering our services on time and within budget. Progrex PMC can also provide independent services or work in collaboration with any team.

Our Services

CPM Scheduling

With a reliable schedule, you can control every aspect of your project to ensure that maximum efficiency leads to a long-term success.

BIM Modeling

Our BIM Consultants offer a wide range of BIM Modeling Services to provide a comprehensive model of a project.

Claim Consulting

Our certified consultants will analyze your project's potential constraints and compile the proper construction claims, if needed.

Cost Management

observe and forecast the possible cost incurred for a certain construction project via a systematic calculation approach.

Risk Management

Effective risk management in your construction project will minimize their threats and maximize their Opportunity.

Training

we believe that sharing knowledge is vital to a thriving industry. If your project team requires insight and guidance on Project Management.
